

TAXMAN

ABOUT TAXMAN

TAXMAN is a tax calculation program that is quick and easy to use, requires minimal disk storage space and works. You can use TAXMAN for preliminary and final tax estimates, tax planning and assessment checking. Listed below are some of the reasons that have made TAXMAN an everyday tool in hundreds of accounting Firms around Australia :

TAXMAN is widely used by Accounting Practices who also use comprehensive tax return preparation software. They also use TAXMAN because of its convenience, speed and flexibility. With TAXMAN you can do tax calculations independently of your tax return preparation software for preliminary tax estimates, tax planning and tax assessment checking.

TAXMAN provides full taxation calculation capability for firms of Accountants who prepare tax returns manually. TAXMAN produces the tax calculation schedules that are normally given to Clients with the manually prepared Taxation return. Because TAXMAN is accurate and easy to use, it will save staff time and eliminate calculation errors.

-We have now been successfully marketing and updating our TAXMAN program for over seven years. The program incorporates tax tables for every year from the year ended June 30th 1984, up to the current financial year. This means that you can do tax calculations on TAXMAN for the last seven years and for years into the future.

-TAXMAN is updated as required, to handle any new requirements, based on changes in tax legislation and changes to the tax table.

-TAXMAN only uses a small amount of disk space and has no effect on your existing programs. Installation takes less than a couple of minutes and TAXMAN can be accessed directly from your master menu. TAXMAN can be used in a network mode. An average calculation can be completed within 30 seconds of selecting TAXMAN from the menu.

-All data input is screen driven. Information can be edited and re-calculated as often as you require. All reports can either be printed or displayed to the screen.

-TAXMAN provides the user with a number of different reports at the press of a button, including a report that is suitable for distribution to Clients and another in the form of an assessment notice. Sample printouts of the reports produced by TAXMAN are contained in this brochure.

-TAXMAN has an option that lets you store tax calculation details for subsequent retrieval and use. The program also enables you to print a step by step calculation audit trail for provisional tax and primary production rebates.

-TAXMAN caters for the majority of special tax situations including automatically handling the following :

- . Pensioner rebates
- . Beneficiary rebates
- . Social Security rebates
- . Other rebates
- . Film/IED/MIC investments
- . Provisional taxes
- . Concessional expenditure
- . Other taxes withheld
- . Eligible Termination pay rebates
- . Investment and property income
- . Provisional tax instalments
- . Imputation credits
- . Foreign tax credits
- . Higher Education tax
- . Primary Producers
- . Medicare (and shading)
- . Prescribed payments
- . Deductions
- . Salaries and wages
- . Minor taxpayers
- . Capital gains tax
- . Threshold reductions

Tax Assessment Summary

=====

for the Year Ended 30th June, 1997

Peter Smith
 Tax File Number - 111265184

Taxable income -	\$90,550.00	
Income tax		\$31,045.50
Capital gains tax		900.00
Less: Rebates -		
Primary production	2,630.21	
	-----	2,630.21

		29,315.29
Medicare levy		1,539.35

NET TAX PAYABLE		30,854.64
Less: Credits -		
Tax instalments deducted	11,600.00	
Provisional tax paid	2,542.00	
	-----	14,142.00

ESTIMATED TAX PAYABLE		16,712.64
Provisional tax - for next year		19,335.00

NET TAX PAYABLE		36,047.64
		=====

Note: Provisional tax can be varied if a reduction in current year income is anticipated. Whilst all due care has been taken in preparing this estimate, it should only be used as a guide until such time as the assessment is received from the Taxation Office.

Although provisional tax is no longer applicable, it is left in brochure because Taxman can go back to 1984 for tax calculations.
